

1<sup>ST</sup> INTERNATIONAL CONFERENCE

# CORROSION AND MATERIAL PROTECTION

*EFC EVENT NO. 294  
UNDER THE AUSPICES OF MINISTRY OF EDUCATION, YOUTH AND SPORTS*

\* \* \*

10<sup>TH</sup> CONFERENCE AKI 2007

**1. – 4. October 2007  
PRAGUE, CZECH REPUBLIC**

---

## PROCEEDINGS

**Enclosure: CD with full text of papers**

**SVUOM Ltd., Prague**  
Institute for Corrosion Research  
and Material Protection

Address:

SVUOM s.r.o.  
U Měšťanského pivovaru 934/4  
170 00 Praha 7  
Czech Republic

Tel.: +420 220 809 981, +420 235 355 851 – 3  
corrosion@svuom.cz

**Title: 1<sup>st</sup> International Conference**  
**Corrosion and Material Protection**  
(Proceedings)

Editor: SVUOM.Praha  
Print: SVUOM.Praha

© SVUOM, 2007

**ISBN 978-80-903933-0-1**

# LIST OF AUTHORS

(Poster presentations: green colour marked)

## Part I

INVITED LECTURES	<u>B. Isecke</u>	<i>Prestressing Steel in Contact with Galvanised Steel - Is there a risk of Hydrogen Embrittlement?</i>
	<u>V. Kučera, J. Tidblad</u>	<i>Atmospheric Corrosion in the Changing Pollution and Climate Situation</i>
	<u>P. Marcus</u>	<i>Experimental (EC-STM) and Theoretical (ab initio simulation) Studies of the Initiation of Localized Corrosion</i>
	<u>G. Schmitt</u>	<i>Advanced Models for Erosion Corrosion and its Mitigation</i>
	<u>J. M. Macak, H. Tsuchiya, K. Yasuda, A. Ghicov, S.P. Albu, A. Singh, P. Schmuki</u>	<i>Ti and Its Alloys: From Passivity Breakdown to Formation of Oxide-Nanotube Layers</i>
	<u>A. Pourbaix</u>	<i>Corrosion Science, Research, Politics and Publicity</i>
	<u>A. Turnbull</u>	<i>New Perspectives on the Evolution of Stress Corrosion Cracks from Pits</i>

## Part II

001	R. Jeffrey, R. Melchers	New Data for Verification of a Phenomenological Model for Corrosion of Steel in Seawater
002	R. Jeffrey	Analysis of Tubercles and Rust Layers Formed on Mild Steel Exposed in Seawater
003	Akanta, T. Abbott, B. Muddle	Modification of Surface Behaviour of Magnesium by Alloying with Beryllium
005	H. Shalaby, W.Riad, M. Rajab	Failure of Steam Superheater Tube of Reformer Heater
006	A.S. Hamada, L.P. Karjalainen, T. Oittinen, M. Oliveira	Corrosion Behaviour of High-Mn TWIPSteels with Electroless Ni-P Coatings
007	A.Beganskiene, J. Kiuberis, R. Raudonis, A. Kareiva	A Sol-Gel Processing Route for the Conservation of Archaeological Pottery
008	V. Pokhmurskii, M. Khoma, O. Arkhipov	New Method Development of Electrochemical Monitoring of the Equipment Subject to Corrosion Mechanical Damage
009	E. M. Gutman	Distinctions in General Corrosion Dissolution of Stressed Metals and Minerals
010	O.A. Goncharova, E.V. Starovoytova, N.N.Andreev	The Effect of Amines on the Corrosion of Steels in Chloride Solutions
011	T. Eichler, B. Isecke, A. Burkert	Electrochemical Noise Measurements for Monitoring the Repassivation of Mild Steel after Cathodic Polarization
012	M. Beck, J. Goebels, A. Burkert	Monitoring of Corrosion Processes in Chloride Contaminated Mortar by X-Ray Tomography
014	V. Alar, I. Juraga, S. Martinez, F. Kapor	Influence of Glyoxal on Austenitic Stainless Steel Localized Corrosion in Well Water

016	D. Vershok, Y. Kuznetsov	The Influence of Cations Composition of Oxidation Solution on the Protective Properties of Bluing Steel
017	G. Bereket, M. Gülec, A.Yurt	Inhibition efficiencies of some organic compounds on the corrosion of zinc in alkaline media
018	G. Lothongkum, P. Thongpakdee, E. M. Gutman	On Applicability of Cycling Polarization Method for the Diagnostics of Susceptibility to Pitting Corrosion
019	I. Milohanović, T. Šimunec, H. Otmačić Ćurković, K. Marušić, E. Stupnišek-Lisac	Copper Protection under Flow Conditions
021	J. M. Macak, A. Singh, A..Seyeux, P.Schmuki	Fluoride Ion Induced Corrosion Effect on Anodic Oxide Films on Valve Metals
022	B. Lesiak, J. Zemek, P. Jiříček	Surface and Interface Characterization of Solids by Electron Spectroscopies with the Aid of Data Processing Methods
023	C. Pirvu, R. Stancu, M. Sovar, I. Demetrescu	Polypyrrole Coatings for Corrosion Prevention of Zinc-Coated Steel Electrodes
024	I. Zarina, R. Ignach, B. Berge	Steel and Non-Ferrous Metal Corrosion Inhibitor in Cooling Media
025	A. E. Kuzmak	Corrosion Kinetics: Coulometric Evaluation Experience
026	L.Lacroix, Ch. Blanc, L. Ressler, G. Mankowski	SKPFM Study of the Corrosion Behaviour of Al-Cu-Mg Intermetallic Particles in the 2024Aluminium Alloy
027	Ch. Augustin, G. Mankowski, E. Andrieu, Ch. Blanc	Propagation Kinetics of Intergranular Corrosion of 2024 Aluminium Alloy in Chloride Solutions
028	V. Rede, I. Juraga, V. Alar	The Effect of Erosion on Pitting Surface Resistance of Duplex Steel Welded Joint
029	S. Martinez, L. Valek, F. Kapor	Cathodic Delamination Tests During the Initial Stage of Coating Cure in Seawater Performed under Various Polarization Regimes
030	L. Ćurković, M. Fuduric, S. Kurajica	Kinetic Study of the Corrosion of Alumina Ceramics in Sulphuric Acid Aqueous Solution
031	A. Hemsch, G. Schmitt, W. Bleck	Advances In Assessing The Susceptibility to Intergranular Corrosion (IGC) of Duplex Stainless Steels Using the Electrochemical Reactivation Test (ERT)
033	I. Flis-Kabulska, J. Flis, T. Zakroczymski	Ingress of Hydrogen into Iron from NaOH Solutions
034	Beibei Xie, Yingying Zhang, Liping Zhang, Yanjun Zhang	Research and Application of Inorganic Alcohol-Soluble Zinc Rich Coatings
035	Yanjun Zhang, Liping Zhang, Wenli Han, Beibei Xie, Yingying Zhang	A Research on SRB Corrosion Resistant Coating
036	E. M. Malygina, S. V. Oleynik	The Features of the Formation of Chromatless Conversion Coatings on Al-Mg Alloy
037	Y. A. Kuzenkov, S. V. Oleynik	The Protective Properties of Conversion Coatings on Al-Cu-Mg Alloy, Obtained in the Alkaline Solutions of Chemical Oxidizing
038	M. Zemanová, M.Chovancová	Corrosion Resistance of Pulse Current Electrodeposited Zinc from Acidic and Alkaline Electrolytes
039	A.A. Chirkunov, Y. G. Bober, Y. I. Kuznetsov, N. P. Andreeva	On the Passivation of Iron by Anions of Sodium Mefenamate
040	A. A. Chirkunov, Y. I. Kuznetsov	Water-Soluble Polymeric Biocide as a New Corrosion Inhibitor
041	K. Inoue, S.-K. Kwon, K. Kimijima, K. Kanie, A. Muramatsu, K. Shinoda, S. Suzuki, Y. Waseda	Corrosion Products Transformed from Green Rust in Aqueous Solutions

042	K. Inoue, K. Shinoda, S. Suzuki, Y. Waseda	In-situ X-Ray Diffraction of Corrosion Products Formed on Surfaces of Iron-Base Alloys
043	R. Vagapov, M. G. Olivier, M. Poelman, J.P. Petitjean	The Effect of Inhibitor Anions on the Corrosion of Aluminium Alloy in Chloride Media
045	G. Schmitt, R. Buschmann, Ch. Olry, B. Motko, P. Schrems	Corrosivity Monitoring via Electrochemical Noise: With a New Diagnostic Tool as Easy as Monitoring Temperatures
046	S. Amirat, R. Rehamnia, Y. Boutaleb, J. Creus	Alloy Zn-Fe Electrodeposition from Electrolyte Chloride
047	R. Rehamnia, A. Messalhi, R. Chater, S. Amirat, S. Chouchane, J. Douglade, J.P. Chopart	Study of Some Surfactants on Sn and Sn-Bi Electrodeposition from an Acid Electrolyte Sn(II) Sulphate
048	B. M. Rosales	Instantaneous Detector of Corrosion Risks in Fuel Tanks
050	Ch. Kleber, R. Wiesinger, J. Schnöller, U. Hilfrich, H. Hutter, M. Schreiner	Surface Sensitive Analytical Methods for the Investigation of the Interaction of Small Inorganic Acidifying Molecules in Humidified Air with Real Nano-Structured Metal Surfaces
051	D. Mohammedi, M. R. Benloucif, A. Benmoussa, E. M. M. Sutter	Corrosion Behaviour of Steel in the Presence of Rare-Earth Salts
053	M. João F. Marques, A. M. Simões, E. Almeida	Anticorrosive Behaviour of Electrodeposited Zinc Coatings: Prephosphated zinc and Zinc-Nickel Alloy
055	A. Marasanova, N. Anufriev	The Electrochemical Method for Determination of Corrosion Rates of Metals in Water-Glycol Antifreeze
056	T. Ishikawa, T. Yoshida, K. Kandori, T. Nakayama, S. Hara	Assessment of Protective Function of Steel Rust Layers by N <sub>2</sub> Adsorption
064	P. Muangtong, T. Sapsapap, A. Gositanon, W. Wachirasiri, S. Chandra-ambhorn	Experimental Potential-PH Diagrams of Aisi 316L Stainless Steel in Sulfate-Containing Aqueous Solutions Constructed by Cyclic Polarisation Method: Effects of Sulfate Ion and Dissolved Oxygen
065	K. Khumpai, W. Tanespolake, T. Charoenrat, S. Chandra-ambhorn	Experimental Potential-PH Diagrams of Aisi 316L Stainless Steel in Sulfate-Containing Aqueous Solutions Constructed by Cyclic Polarisation Method: Effects of Solution Temperature
066	L. Fachikov, D. Ivanova	Passivation of Zinc Surfaces by Molybdenum Solutions
067	M. Marcu, A. Banu, T. Spataru	Electrochemical Synthesis of Polymeric Films on Stainless Steel Electrode
068	G.Z. Olivares, M.J. H. Gayosso, R.G. Esquivel	Corrosion of Steel Pipelines Transporting Hydrocarbon Condensed Products, Obtained from a High Pressure Separator System. A Failure Analysis Study.
069	D. Gorščak, P. Panjan, L. Čurkovič, M. Čekada	Characterization of PVD Coatings Deposited on Powder Metallurgy Steels
070	J. Zýka, F. Hnilica	Influence of Hydrogen on Mechanical Properties of Concrete Reinforcement Prestressing Steel
071	H. Tansug, N. Funda Ak Azem, U. Malayoglu, A. Çakır	Production and Electrochemical Characterization of Brushite Films Produced by Polarization Techniques
072	G. Raichevski, N. Boshkov, R. Raicheff, N. Tsvetkova, K. Minkova, I. Topalova, L. Lutom	Corrosion Investigations and SEM Studies of Austenitic Stainless Steel Used in the Steam Generators of the Nuclear Power Plant "Kozloduy"
073	T. Shibata	Application of Extreme Value Statistical Analysis for Estimation of Minimum Wall Thickness of Carbon Steel Pipe
074	J. Sojka, L. Rytířová, M. Jérôme	Influence of Microstructure and Specimen Orientation on Hydrogen Diffusion Coefficient in Micro Alloy API Steels
075	M. Desai, J. Talati, N. Shah, G. Mudaliar	A Comparative Study on the Effectiveness of Aniline-N-Benzylidene and Aniline-N-Salicylidene as Inhibitors in Corrosion Protection of Zinc in Hydrochloric Acid
076	J. Kabátová, J. Kudrman, R. Chlubnová	Affecting Titanium Alloys by Concentration of Added Metals and Heat Treatment

077	Y. Watanabe, K. Sue, Y. Daigo, Y. Kurata	Oxide Solubility-Based Prediction of Corrosion Rate of Ni Base Alloys in Supercritical and Sub-Critical Water
078	B. Eremiáš, V. Číhal, E. Kalabisová, V. Janík	Kinetic Parameters of Pit Nucleation for High-Alloyed Stainless Steels and Alloys in the Environments Modelling Waste Water Treatment of Flue Gas Desulphurization Plants
079	F.Di Gabriele, A.Doubková, A.Hojná	Sensitivity to Environmentally Assisted Cracking of Ferritic Martensitic T91 in Contact with Liquid Pb-Bi Eutectic
080	K. Dalíková, V. Číhal, J. Kunz	Stress Corrosion Cracking at Slow Strain Rate Test of High Alloyed Ni-Cr-Mo Steels and Nickel Alloys
081	J. Verner, M. Hajčček, V. Hamouz, B. Ransdorfová	Properties of Tungsten Heavy Alloys (WHA)
082	V. Číhal, Z. Krhutová, J. Míka, E. Kalabisová, S. Lasek, M. Blahetová, M. Beránková	Metallic Answers for FGD Systems
083	A. Hojná, F. Jelínek, D. Kárník	Electrochemical Evaluation System - Modular System for Long-Term On-line Monitoring of Corrosion Processes in Structural Crevices of Steam Generator Secondary Circuits
084	M. Poddaná, V. Číhal, E. Kalabisová	Corrosion of Stainless Steel in Fluoride Environment
085	D. Knotková, K. Kreislová	Changes in Corrosion Rates in Atmospheres with Changing Corrosivity
086	T. Kubatík, D. Vojtěch, E. Kalabisová, V. Číhal	The Effect of Fluorides on Ternary Ti-Al-Si Layers on Titanium and Alloys of Titanium
087	J. Racek, E. Kalabisová, M. Hubičková	Importance of Oxygen and Carbon Groups in the Rubber Linings Service Lifetime
089	P. Novák, M. Kouřil, Š. Msallamová, Š. Krtička	Cathodic Passivation
090	L. Joska	Ti Grade 2 and Ti15Ta Alloy- Comparison of Corrosion Behaviour in Fluoride Containing Physiological Solution
091	M. Kouřil, J. Hak, L. Joska	Detection of Localized Corrosion of AISI 316L Steel by Means of Electrochemical Noise
092	H. Geiplová, K. Kreislová, R. Wasserbauer	The Effect of Biological Sediment on the Durability of Paint Systems
093	J. Benešová, M. Svoboda, M. Paráková, M. Zakucia	Possibility of Prediction of Paint Systems Efficiency Based on the Laboratory Test Results
095	S. Lasek, V. Číhal, M. Blahetová	Possibility of cyclic potentiodynamic method for the detection of sensitivity of selected stainless steels to intergranular corrosion
096	M. Blahetová, S. Lasek, V. Číhal, R. Blaheta	Computer Modeling of Stress Corrosion Cracking during Drop Evaporation Test (DET)
097	L. Bech	Non-destructive EPR Method in Nuclear Power Engineering
098	Y. Takeda	Application of Raman Spectroscopy Analysis for the Oxides Formed on Hastelloy-XR in High Temperature Helium Environment at 950°C
099	M. Beránková, M. Procházka	NDT Tests Performed in Power and Heating Stations Desulphurizing Units
100	H. Klapper, A. Heyn, J. Göllner	First Approximations of the Influence of the Cathodic Process on the Electrochemical Noise Signal
101	A. Heyn, J. Göllner, H. Klapper, S. Zind	Using of Electrochemical Noise for Corrosion Testing
102	L. Mindoš	Prediction of Durability Progress Trend of Hydrophobic Impregnation Exposed at Outdoor Atmosphere

103	V. Číhal, M. Blahetová, E. Kalabisová, Z. Krhutová, S. Lasek	Electrochemical Polarization Reactivation Method- EPR Test Evolution
104	P. Sajdl, P. Kučera, J. Cizner, O. Brenner, M. Hubičková, J. Petrů, R. Novotný	Material Testing under SCWO Condition
105	A. Kalendová, J. Veselý	Nanoparticles of Alkaline Silicates as Corrosion Inhibitors in Water-Based Coatings
